  -  Airports with clubs within 5 miles
  -  Clubs within 5 miles of airports.
  -  Heliports
  -  Seaplane Base
  -  Military Bases and National Parks
- } Notification Not Required
- } Notification Required

Identify AMA clubs (yellow) and Airports (green) not requiring notification.

Identify AMA clubs (blue) and Airports (red) that require notification.

Select or De-select marker check boxes in the DESCRIPTION row at the base of the map to display or not display any of the seven map marker types.

Markers may be displayed by COUNTY selections in the drop down menu above the map.

Clubs offering “Intro” pilot training may be displayed by selecting the INTRO menu above the map.

Radius distances between any address entered into the location search box under More Options, to any markers, may be determined.

**DESCRIPTION:**  AIRPORT  AIRPORT\*  AMA-CLUB  AMA-CLUB\*  CAUTION  HELIPORT  SEAPLANE

AmaMapAid - Locate AMA club flying sites and airports. Identify their contacts, websites and other detailed data. Sort/Filter club(s) and/or airport(s) by State or County(s). Find clubs that offer "Intro" pilot training. Determine radius distances between clubs and/or airports. Prohibited and Restricted airspace identified. One click access to clubs within 5 miles of airports for notifying airport authority of intended R/C flying. (\*Notify)

1. All of the seven icon marker types in the "DESCRIPTION" row are checked and so all can be seen and clicked on for location and contact data.
2. The map can be moved with a click+hold on the map and then slide the map in any direction. The + / - (top left) can be used to zoom in or out. Clicking on + multiple times will zoom in and spread the distance between markers.

One click access to clubs within 5 miles of airports for notifying airport authority of intended R/C flying. (\*Notify)

9. Selecting a "Hybrid" map (upper right menu) provides a Satellite view of the areas surrounding a club's flying site. Sensitive areas that may present a hazard to people or property may be identified. NO FLY zones can be created to allow for greater separation from the flight area boundaries or the site layout and runways may be reoriented to mitigate risks.

AmaMapAid - Locate AMA club flying sites and airports. Identify their contacts, websites and other detailed data. Sort/Filter club(s) and /or airport(s) by State or County(s). Find clubs that offer "Intro" pilot training. Determine radius distances between clubs and/or airports. Prohibited and Restricted airspace identified. One click access to clubs within 5 miles of airports for notifying airport authority of intended R/C flying. (\*Notify)

10. Select “More Options” (upper left menu) then click on “Nearby” enter any address or GPS, a “Radius” in miles, check “show circle” and click on “Find Nearby”. The above was a random address in Marlborough, MA and we learned that there were 2 clubs, 3 heliports and two airports from the location someone might have been considering to fly their drone. This is a great tool to check any location at any distance.
